

Washer Loader washer assembly unit

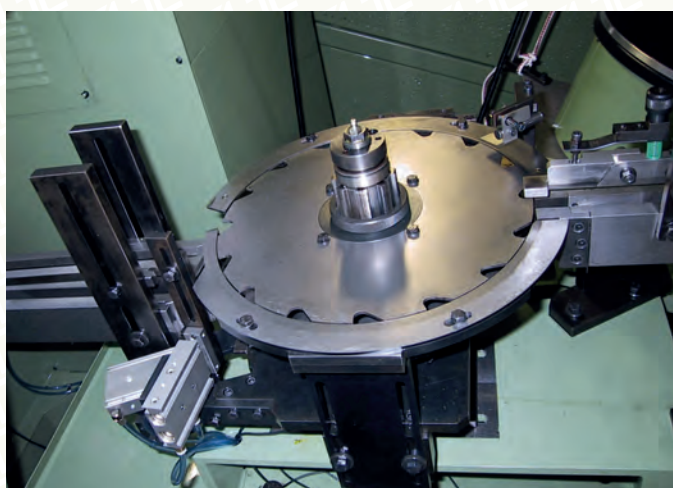

WA

TLM Washer Loaders are automatic assembly systems composed of 150/200/300 mm diameter carousels to allow for assembling micro-washers up to a washer diameter of 60 mm. The mechanics of these units are managed electronically via PLC with logics which ensures the total absence of production waste.

TLM's model represents the only Washer Loader allowing a size change in 15 minutes; also it can guarantee the lack of screws without washers in the production.

- Washer Loader WA configurable with carousels with diameter from 150 mm - 200 mm - 300 mm.
- For the assembly of washers - diameter 10 to 60 mm.

Technical features: approximate values. The machine speed can change according to the material used and the type of item to be rolled. Measures in mm.

Output capacity	Washer diameters	Total power of motors
min 80 max 400	min 10 max 60	HP 1
